A - Quantitative Evidence This is evidence which is numerical and should include the number people who use the service and the number of people from the protected characteristic groups who might be affected by changes to the service.

Monthly usage sample - No information received

Of 9 survey respondents relating to Dalgrain Hall, none expressed they have a protected Characteristic that disadvantaged them.

B - Qualitative Evidence This is data which describes the effect or impact of a change on a group of people, e.g. some information provided as part of performance reporting.

Social - case studies; personal / group feedback / other

General comments by residents on the potential impact of a closure on protected characteristic groups:

I use building for some of groups run without it the old town would have nothing on their doorsteps to use or hire if needed I travel to use it but have relatives living in area who over years have used and their families too every house has the right to have a community focus to use and there's no church or other building near by.

Dalgrain hall has no alternative for venue especially for the children of the youth club who the majority of them live in the old town.

We only have the hall for our small ward not everybody drives so it's a community place

I hold classes for yin & wellbeing yoga. Shutting these buildings would be disastrous to so many people's mental health.

Best Judgement:
